Lucas Marcel Silva de Brito

A Brazilian web developer who specializes in TypeScript and is a Next.js enthusiast.

Resume

I've 20 years old, I live in Brazil (Macau - RN) and I finished technical high school in informatics at IFRN - MC in 2022, even receiving an academic honor. During this period I became a professional in web development with technologies such as React.js, Next.js, and Node.js. After finishing the Rocketseat's Ignite course I got a full scholarship in Do While 2021.

At the moment I prefer the Front-end, but I know a bit of everything I need to complete my projects by myself (including the Back-end development process). My favorite framework is Next.js. Some of his features, particularly the page rendering approaches, allow for a better user experience that fits a variety of use cases. In addition, using serverless functions I can deploy the ecosystem of my small projects in a practical and fast way without the necessity of breaking apart the Front-end from the Back-end completely.

Four years ago (in 2018), I had my first experience with programming. Python was awesome, but I love JavaScript so much more. And today I'm still willing to expand my skills and learn new things like before, continuing my studies.

Some competencies

- I know and have used agile methodologies;
- I've experienced a variety of deployment options;
- I understand the database's entity relations;
- I develop responsively;
- I try to try new things;
- I can find and resolve errors myself.

Soft skills

- Fast reasoning;
- Dedication;
- Constant learning;
- Objectivity;
- Flexibility.

Courses and certificates

- Do While 2021 – Rocketseat – Jan. 2022;
- Ignite: React.js – Rocketseat – Dec. 2021;
- IoT – Cisco Network Academy – Dec. 2020;
- Semana Omnistack 11 – Rocketseat – Mar. 2020.

Technologies proficiency

Next.js

React.js

Node.js

Typescript

Javascript

CSS

HTML

Git

Languages proficiency

- Portuguese – native;
- English – technical.
