A front-end developer

Resume

I studied computing in IFRN - MC and finished the technical high school level in 2022. On this period, I decided to dedicate to the software development, and I've been studying until then technologies like React.js, Next.js and Node.js. JavaScript with TypeScript, on general. I paid for the Ignite course of the Rocketseat and I got a complete scholarship some later. I've the certificate in React.js, but I know a lot of the Node.js too.

My favorite son is Next.js, together we can: make amazing pages with SSR (Server-side Rendering), SSG (Static Site Generation) and CSR (Client-side Rendering) – used to make SPA (Single-page Applications); use serverless functions and reduce deployment cost; force the revalidate of some pages with the latest resources (v12.1.0); and play with React.js without missing out on his incredible experience.

Furthermore, I've a dream: get my first job to put my skills into practice. For this, I'm willing to expand my knowledge and learn new things. I've been following this path for at least 3 years.

Technologies

- JavaScript
- TypeScript
- Next.js
- React.js
- Node.js
- HTML
- CSS or SASS
- Declarative interfaces
- Framer motion
- Prisma
- Git & Github
- VS Code

Competencies

- Agile methodologies' knowledge;
- Experience with many deploy options;
- Database's entities relations knowledge;

- Ready to do responsive;
- Framer motion animation's knowledge.

Soft skills

- Fast reasoning;
- Dedication;
- Constant learning;
- Objectivity.

Courses and certificates

- Do While 2021 – Rocketseat – Jan. 2022
- Ignite: React.js – Rocketseat – Dec. 2021
- IoT – Cisco Network Academy – Dec. 2020
- Semana Omnistack 11 – Rocketseat – Mar. 2020

Languages

- Portuguese – fluent;
- English – technical:

    Without real listening or speaking experience.
