A full-stack developer

Resume

I studied computing in IFRN - MC and finished the technical high school level in 2022. During this period, I dedicated to the software development with technologies like React.js, Next.js and Node.js. After finishing the Ignite course of the Rocketseat, I got a complete scholarship some later.

My favorite framework is Next.js. Together, we can make amazing pages with SSR (Server-side Rendering), SSG (Static Site Generation) and CSR (Client-side Rendering); to use serverless functions and reduce deployment cost; force re-validate on demand of some pages with the latest resources (v12.1.0); and to play with React.js without missing out on his incredible experience.

I've a dream: to get my first job to improve my skills. For this, I'm willing to expand my knowledge and learn new things. I've been following this path for at least 3 years.

Technologies

- JavaScript
- TypeScript
- Next.js
- React.js
- Node.js
- HTML
- CSS or SASS
- Declarative interfaces
- Framer motion
- Prisma
- Git & Github
- VS Code

Competencies

- Agile methodologies' knowledge;
- Experience with many deploy options;
- Database's entities relations knowledge;
- Ready to do responsive;
- Framer motion animation's knowledge.

Soft skills

- Fast reasoning;
- Dedication;
- Constant learning;
- Objectivity.

Courses and certificates

- Do While 2021 – Rocketseat – Jan. 2022
- Ignite: React.js – Rocketseat – Dec. 2021
- IoT – Cisco Network Academy – Dec. 2020
- Semana Omnistack 11 – Rocketseat – Mar. 2020

Languages

- Portuguese – fluent;
- English – technical:

    Without real listening or speaking experience.
